Adidas Adistar Quick Course

The Adidas Adistar range is designed for Customers who want maximum cushioning for longer distance running. This course will help you identify what the Customer needs, choose the right Adistar shoe, and explain the recommendation with confidence.

Customer Moment

A Customer walks in and says, “I am building up to longer runs, but I need a shoe that feels cushioned and comfortable at an easy pace.”
This is a clue that **Adidas Adistar** may be the right range to recommend.

Adistar is for Customers who want maximum cushioning, comfort, and support for longer easy-paced running. easy-paced running. easy-paced running.

Product Basics

Adistar is an Adidas running range for Customers who want maximum cushioning, reliable comfort, and supporvt for longer distance running. It is a strong option when a Customer runs further, prefers an easy pace, or asks for a soft and stable feel underfoot.

Recommend Adidas Supernova when Customers say they want to:

- **Run longer distances**
- **Feel more cushioning during easy-paced runs**
- **Get support when they run further**
- **Feel stable while running longer distances**
- **Have reliable grip for regular running**

Key Benefits

Repetitor cushioning, Guidance Rail (Stability Frame) support, Lighttraxion grip, and Adiwear durability help Customers feel cushioned, supported, and secure during longer easy-paced runs.

Product Range

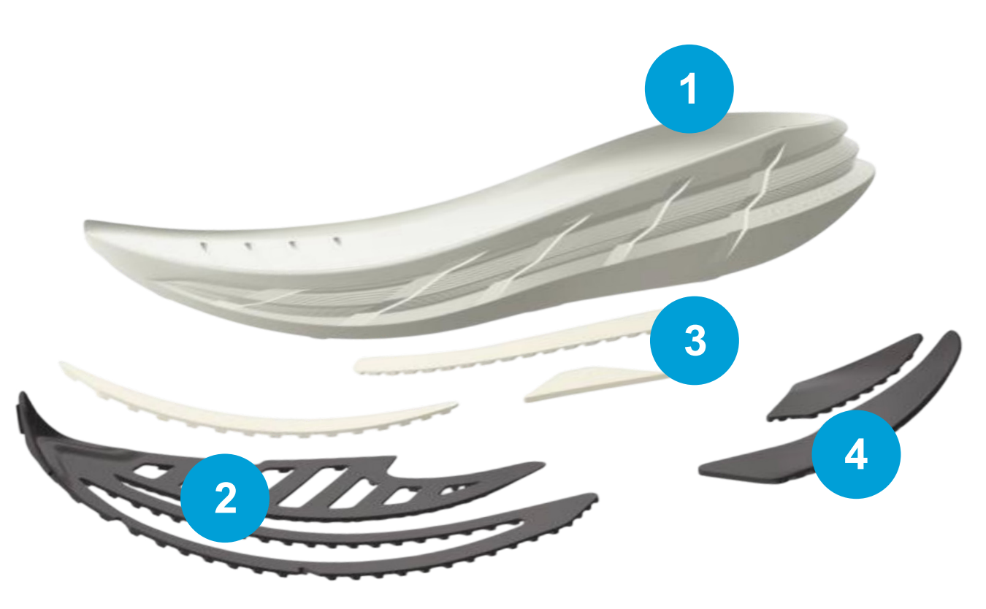
Adistar Charge

Adistar 4

How to explain the Technology

Keep technology explanations short. Start with the feature, explain the Customer benefit, and then use a simple selling phrase. Click each number to learn more.



1. **Repetitor midsole**
2. **Guidance rail**
3. **Lighttraxion outsole on Adistar 4**
4. **Adiwear rubber outsole on Adistar Charge**

Benefit
Provides maximum cushioning for distance running.

Say it like this
“This gives you a cushioned feel for longer easy-paced runs.”

How to Sell

Key Selling Message

Use a simple flow: ask one question, listen for the Customer’s cushioning, support, and distance need, then recommend one Adidas Adistar option with one clear benefit.

Ask:
“What distance are you running, and do you want the shoe to feel more cushioned, stable, or both?”

→

Listen:
Is the Customer talking about longer runs, easy-paced running, maximum cushioning, stability, support, or grip?

→

Recommend:
Match the shoe to the Customer’s need and explain one clear benefit.

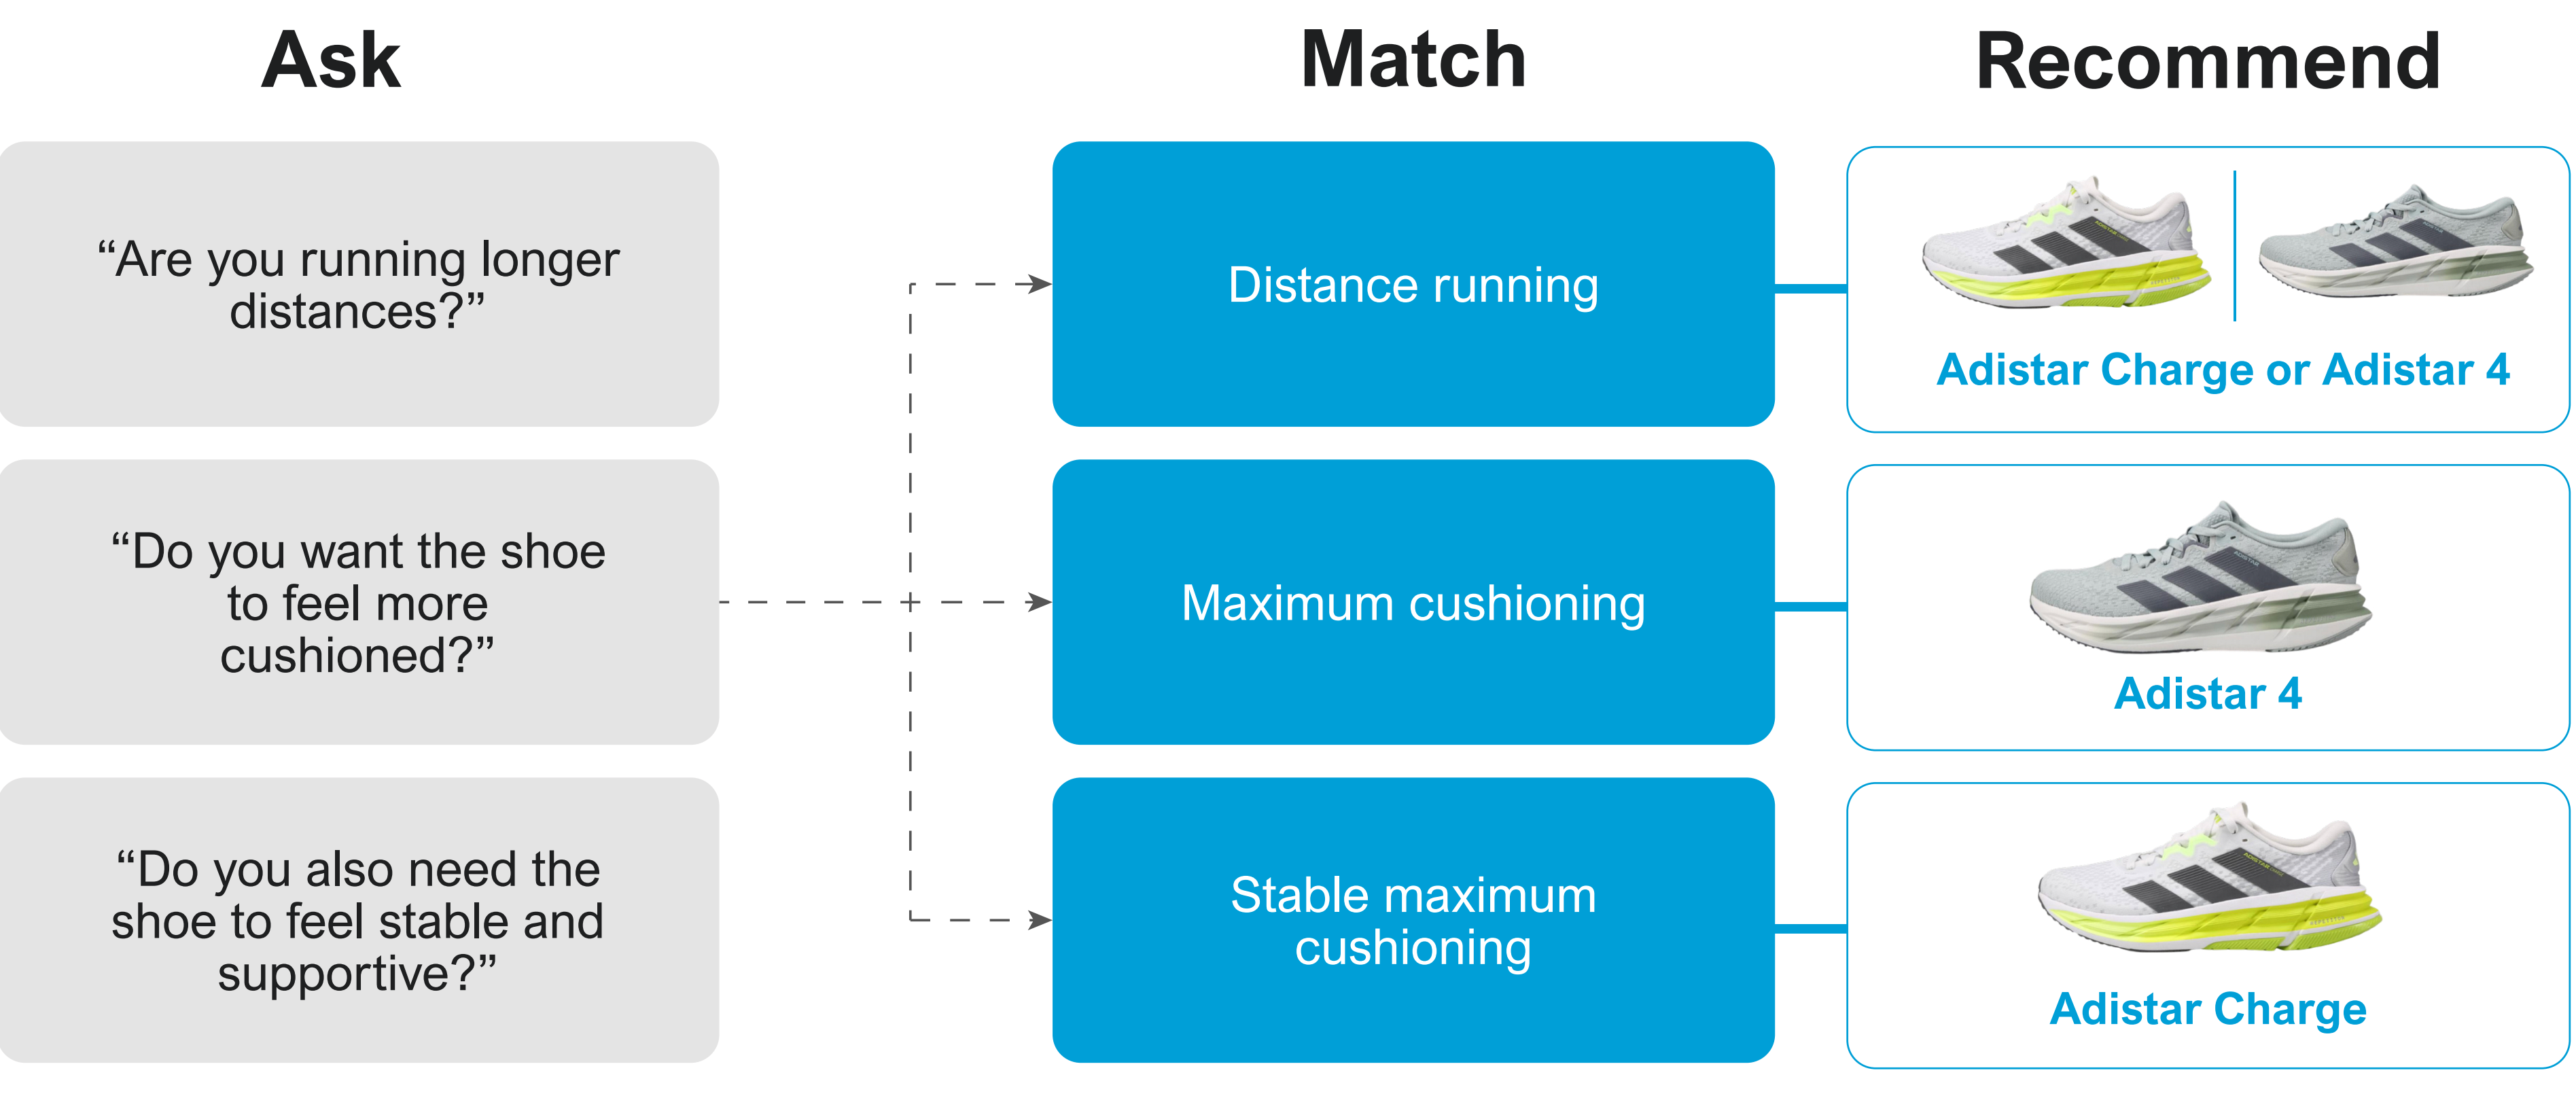
Example recommendation: “Because you are running longer distances and want a more stable cushioned feel, I would show you the Adistar Charge. It gives you maximum cushioning with added stability and grip for distance running.”

Customer Scenario

Use this example to see how a store employee can move from Customer need to product recommendation.

Customer
“I am running longer distances at an easy pace. I want maximum cushioning, but I also want the shoe to feel stable when I get tired.”

Store Employee
“Based on what you need, I would show you the Adistar Charge. It gives you stable maximum cushioning, so your run can feel more supported over distance.”



Ask	Match	Recommend
“Are you running longer distances?”	Distance running	Adistar Charge or Adistar 4
“Do you want the shoe to feel more cushioned?”	Maximum cushioning	Adistar 4
“Do you also need the shoe to feel stable and supportive?”	Stable maximum cushioning	Adistar Charge

Assessment

1. Scenario: A Customer says, “I am running longer distances now, and I want a shoe that feels soft and cushioned for easy-paced runs.”

Question: What is the best response?

A. Recommend a racing shoe because the Customer is running longer distances.

B. Recommend Adistar 4 because the Customer wants maximum cushioning for longer easy-paced runs.

C. Recommend a lifestyle sneaker because the Customer wants comfort.

D. Recommend any Adidas shoe because all running shoes feel the same.
